Seattle, WA. 98101-2038

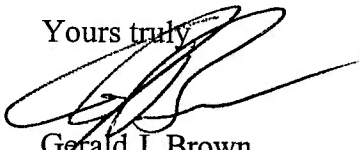

Re: Notice of Violation No. 3-001111

Dear Ms. Gilpin:

NOV No. 3-001111 requires a written response describing the corrective action taken to achieve compliance. The filter bags for Coal Mill #2 dust collector were approaching the end of their service life causing visible emissions from Coal Mill #2 that did not exceed 5% opacity. These air filter bags were replaced in the dust collector during the week of September 12, 2004. As a result of this action, no further emissions were noted from this dust collector

Please let me know if you have any further question.

Yours truly

Gerald J. Brown
Manager Safety and Environment
